

THE DASH 3 WILLIAMS EDITION

MAINTENANCE

CHECKLIST

BEFORE EVERY RIDE

- ☐ • Brakes: Firm, consistent lever pressure
- ☐ • Tires: Properly inflated, no visible damage
- ☐ • Stability: Handlebars and locks secure

BATTERY CARE (ONGOING)

- ☐ • Store in a cool, dry place
- ☐ • Avoid extreme heat or cold
- ☐ • Charge every few weeks if not riding
- ☐ • Unplug once fully charged

EVERY 50-100 MILES

- ☐ • Tire pressure: 43 PSI
- ☐ • Wipe exterior with damp cloth
- ☐ • Check bolts & fasteners (use blue Loctite if needed)
- ☐ • Inspect battery receptor gap (1 mm or less, tighten to 4 Nm)
- ☐ • Rear axle: Lubricate if squeaking (10 Nm, blue Loctite)

EVERY 300 MILES

- ☐ • Replace brake pads if under 1 mm
- ☐ • Tighten brake calipers to 7 Nm
- ☐ • Check tire tread and grip

ANNUAL CHECK

- ☐ • Front LED and rear brake light working
- ☐ • Display and throttle response normal
- ☐ • Folding mechanisms smooth

STORAGE & PRO TIPS

- ☐ • Fold head tube, remove seat for storage
- ☐ • Store indoors, dry location
- ☐ • Review checklist every few months
- ☐ • Address unusual sounds early
